The Incident Summary provides an overview of the number of calls for each month and the incidents. A Year-To-Date comparison of the prior year is provided to view how SFD's calls are trending from the year prior.

This chart shows the total number of calls received in each station's response area compared to the total number of calls to which each station's crews responded. Station crews not only respond to their own area, but, when needed, to other areas of the fire district and region.
